

Product Name: Academi-Slug

Team Name: Team Academi-Slug

Sprint Completion Date: December 2nd 2018

Sprint Report Report #4: Academi-Slug

Actions to Stop:

- Avoiding communication when needing help
- Being lenient on tasks that require a lot work for the future of the product
- Not discussing details of sprint in-depth so that everyone can be on the same page

Actions to Start:

- Communicating more when unable to meet in-person.
- Create documentation for old/new functions.
- Cooperate more with different people in order to get hold of more user stories.
- Use Scrum board and Burn-up to figure out tasks remaining
- Being on-task and on-time with work given

Actions to Continue:

- Meeting up to work on the project together to solve technical problems as a team
- Creating pull requests
- Dividing up tasks so more work is done overtime
- Update Scrum Board and Burn-up chart

Work Completed:

- Completed main platform of academi-slug
- Included chat integration for tutees to connect with tutors
- Completed majority of Unit Testing
- Fixed all remaining bugs.

Work Not Completed:

- Anything in the backlog
- Populate the class schema in the database to reflect when I user adds a class.
- Update profile routing.
- Save chat history between two users.
- Reformat CSS to use relative positioning

Work Completion Rate:

- **Number of User Stories Completed: 1.**
- **Ideal Arbitrary Effort Units: 23.**

(Work hours per se were not estimated. We designed our own story points, as we were told to do at the lecture.)

- **Number of Total Days: 14.**
