

**Product Name: Academi-Slug**  
**Team Name: Team Academi-Slug**  
**Sprint Completion Date: 11/18/2018**  
**Revision Number: v1.0**  
**Revision Date: 10/22/2018**

## **Sprint Release Plan #3: Academi-Slug**

**Goal for Sprint 3:** Implement a fully functionally web application that holds up to the coding standards, test cases, and capable of successfully integrating with all components of the applications

### **Task Listing (through User Stories):**

User Story #1: As a tutor, I want to be able to integrate my LinkedIn profile to display my skills.

Task 1: Find a LinkedIn plugin and create a button using HTML, CSS, JavaScript  
(ETA:2)

User Story #2: As a developer, I want to adhere to uniform coding standards to ensure that my teammates can understand my code.

Task 1: Check if all the code pushed follows all the same coding standards stated in the coding review document. (ETA:1)

Task 2: Make sure other group members are also following these coding standards.  
(ETA:1)

User Story #3: As a developer, I want to ensure that all components of my application are functioning correctly with each other.

Task 1: Make sure all intended components are included onto the application (searching, reviews, etc) (ETA:4)

Task 2: Confirm proper functionality of all components and that all components interact with each other (ETA:4)

User Story #4: As a developer, I want to rigorously test my applications to ensure that others cannot break my code.

Task 1: Use Mocha.js and Chai.js to test functions and confirm that they do what they are intended to do (ETA: 4)

## Team Roles:

Timothy Nguyen: Product Owner (PO), Developer  
Jan Rybojad: Developer  
Charishma Thota: Scrum Master, Developer
